5W DATA / VOICE TRANSMISSION SYSTEM HL 680

5W Data / Voice Transmission System HL 680

In collaboration with ICOM France, the specialist in radio telecommunication, TAG Heuer has developed a new radio system combining the traditional voice communication with the protocols dedicated specifically in our Chronoprinter 540, allowing transmission under the best conditions, all timing information.

Easy to use, this transmission system is accessible and flexible in any circumstance.

Its 5 Watts power makes it possible to transmit information to several kilometers of distance.

It is possible to set the frequency and also the power of the HL 680, and which makes it possible to carry out various configurations between several CP 540 and one PC for example.

Specification techniques:

Frequency: 136-174 MHz (max 128 channels)

Power: 1W, 2W or 5 W

Weight: 250g/ unit

Dimension: 56 X 97 X 36,4mm

Consumption max: Emission 5W: 1,8 A
